

- Before you apply the salicylic acid, soak wart in warm water for 5 minutes
 - a) Dry area thoroughly. (Use a towel that will not be used by others, since the wart virus can be contagious.)
 - b) Gently remove any loose tissue by rubbing with a brush, wash cloth or emery board.
 - c) Apply small amount of liquid or piece of patch to cover the wart. Repeat this procedure once or twice a day.

- Salicylic Acid comes in patches (40%) or liquid (17%)

- Patches Brands-Wart Off, Tinamed, Dr Scholl's, Compound W, etc..
Liquid Brands- Pedifix Wart Stick, Tinamed, Dr Scholl's, Compound W, etc...

- With use, the skin will turn white and fall off.
